

Information Communication Technology (ICT) being used by the Deemed to be University for effective teaching learning:

- VISTAS has a policy to focus conveniently to create and enhance IT Infrastructure facilities to promote research and also advancement in Teaching Learning methods.

- The courses on SWAYAM are produced and delivered by faculties from AICTE for self-paced and international courses, NPTEL for engineering, UGC for non- technical post-graduation education, CEC for under-graduate education, NCERT & NIOS for school education, IGNOU for out of the school students, IIMB for management studies. However, most of the courses are handled by academicians who cater to advanced learners. Since VISTAS caters mainly to the students from the lower and middle strata of the society, most of the students find the video lectures of SWAYAM to be too difficult to follow. To overcome this issue, the IQAC of our Institution, proposed the developing of e- content by our own experienced faculty members. The move was welcomed by all the stakeholders. The Audio-Video capturing module was setup by M/S Edutech. The AV Capturing module captures the lecture of the faculty handling the class. Later, the content is edited and the module is stored in the MOODLE platform. The experienced faculty members of different department have delivered lectures which can be understood by our students and the same has been stored in the moodle platform. The students thereby can access the lectures anywhere anytime in an understandable way. The feedback on the courses developed has a positive feedback and impact.

- VISTAS has Wi-Fi facility for students and faculty members to avail internet connection in the campus, hostel & staff quarters. The connectivity through a fully networked campus with state-of-the-art IT infrastructure, computing & communication resources, offers students the facilities of e-mail, Netsurfing, up/down loading of web based application, besides helping them in preparing projects & seminars.
